Levi Van Buggenum presented two schematic options for the building complex. These options were discussed in detail which led to Karen Kelly's summary of project design and the next steps moving forward. The summary is as follows:

- Use the material concept of a natural design that is more cost effective.
- Separate the band shell from the rest of the building
  1. Leave the band shell open
  2. Use natural colors with exposed beams
  3. Use natural flow of the ground using natural drainage for seating
- Restrooms face the playground
- Explore using rock on the building
- Path to the building connects to the existing pathway in the park

Karen Kelly set up a meeting to finalize the schematics and discuss the costs of the building. An email will be sent to City Hall with the plans. The next meeting will be held at 6:00 p.m. on November 21, 2016 at the Upton Community Center.
